

Work for students who are learning from home will be posted onto Microsoft Teams. Each teacher will post the work to the class Team for their subject.

We would suggest that students follow their normal school timetable to help provide structure to their studies.

The work will be posted to the General Channel in each class Team. In the screenshots on the left (on a mobile phone) and below (on a computer) you can see a post that explains what the work is for a lesson on Wednesday 1st December, along with an attachment presentation.

Work that is set for the whole class, such as homework, will be set as an Assignment- please note this is different to the posts detailing work for students who are absent.
